i'm so jealous!

You are about to eat some serious deliciousness. In order to enjoy this entree as it was created, you must pre-heat your oven at 350°, remove plastic lid, place tray on a cookie sheet and bake on the middle rack for 30-45 minutes until the internal temperature of this yumminess is 165°.

You can then enjoy the fabulous choice you made and tell your partner/friends/date/in-laws/dog that you made this dish yourself.

it's cool. we won't tell.
